

## Pipette Filter

The filters for pipette tips are made of UHMW-PE, these hydrophobic filter elements provide aerosol barriers for pipette tips, prevent any fluids and liquid vapors from reaching the internal components of the pipette, prevent samples from cross-contamination, protect operators and pipettes.

We provide standard filters for pipette tips of 20µl, 50µl, 100µl, 120µl, 200µl, 300µl, 500µl, 1000µl, 1200µl, 5000µl and 10ml, also provide the direct replaceable filters for pipette.

Common pipette filters and self-sealing pipette filters are available.
